The site plan illustrates the proposed building footprint (8,163 SF) and stormplanter (112 SF) for the 7661 SW Capitol Hwy project. The plan includes various setbacks and easements, such as a 10' wide landscape buffer, a 5'-0" entry canopy, and a 1'-0" new property line. Surrounding areas include R5-Residential and CS-Storefront Commercial zones. Key features include an existing covered outdoor patio area, a canopy above the new property line, and a relocated (E) OHP line. The plan also shows the location of an existing utility pole and a fire hydrant. The proposed building footprint is situated between SW Capitol Hwy and SW 31st Ave, with a 10' wide landscape buffer to the north. The stormplanter is located to the west of the building footprint. The plan includes various setbacks and easements, such as a 10' wide landscape buffer, a 5'-0" entry canopy, and a 1'-0" new property line. Surrounding areas include R5-Residential and CS-Storefront Commercial zones.
